

# A PLUGBOARD FOR HOUSING SOCKETS AND MICRO-RELAYS

## Abstract

A plugboard for housing sockets and micro-relays, of the type used for housing a plurality of connectors, sockets or micro-relays, which is composed of a base (1) and a plurality of holes for housing connectors, sockets or micro-relays (2), said holes not being aligned with each other and with the position of alternating holes for introducing the connector, socket or micro-relay rotated  $180^\circ$  with regard to the position of the remaining holes intended for housing the connectors, sockets or micro-relays of the ends of the plugboard.
